TRUE-TO-NAME FRUIT TREES FOR SEVENTY-FOUR YEARS

Fast Fruiting Strains of Apples

TODAY FRUIT GROWING is making inroads on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

**PLANT WITH
HARRISONS'
BUD SELECTED
SUPER STRAIN
FRUIT TREES**

**IT'S YOUR OPPORTUNITY
TO PLANT THE
BEST THERE IS IN FRUITS
AT LOW PRICES**

ONE-YEAR APPLES

GET YOUR ORDER IN EARLY. Growers with a vision to the future should capitalize now by planting new orchards. You get the biggest dollar's worth from Harrisons', both in quality and price.

FACTS WORTH READING ABOUT

MONEY IN FRUIT GROWING

Leading Orchardists Prefer Harrison Grown Fruit Trees

**ALIVE HEALTHY FRUIT-BEARING TREES
DEPEND ON THE HEREDITY OF
YOUR TREES**

In the summer and early fall of each year, while fruit was on the trees, the utmost care was exercised in selecting the new "budding stock" from extra, vigorous, bearing trees showing superior strains with extra heavy bearing habits for the young Harrison fruit trees developing in the nursery.

**YOU PAY NO MORE FOR HARRISONS'
"BUD-SELECTED" TREES**

The "bud-selection" method to propagate is very expensive—but whatever the expense they are the trees that give satisfaction. Remember the inborn inheritance is the final quality built into Harrisons' trees. The young fruit trees are first generation from bearing.

**FINEST QUALITY FRUIT TREES ARE
PROPAGATED FROM BEARING
ORCHARDS**

If fruit trees are continuously propagated from the nursery rows, as practiced now by a large percentage of nurserymen, because it is cheaper, fruit trees begin to degenerate—and when the original was a poor type, the nurseryman, without knowing it, continues to reproduce poor, undesirable, small type fruit. Incidentally, in case there was a mixture in the nursery rows, how could a nurseryman propagate true-to-name trees successfully. Nothing can compare with our scientific method of "bud selection"—it always gives complete satisfaction.

HARRISONS' "BUD STRAINS"

Harrisons' "bud selection" of propagating direct from bearing trees of known sturdy ancestry, superior strains, being the highest coloring of fruit, with extra heavy bearing habits, has made the greatest contribution in directing and fixing the characteristics of the yield: of perfecting color; increasing the size of the fruits and the volume, as well as regularity of the crop.

**GROWN ON "BRINK" OF ATLANTIC OCEAN
WITHSTANDS MANY CLIMATIC CHANGES**

Our favorable climatic conditions, being located only eight miles from the Atlantic Ocean with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrisons' to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruitgrowing section of the United States.

Profits in Pollinization

All varieties of Apples, Pears, Plums and Sweet Cherries must be cross-pollinated to insure a full set of fruits, especially in a season when the weather is cool, cloudy, or raining during the blooming time. Plant at least 1 or 2 trees as pollinizers for every 20 trees of a single variety. A moderately self-fertile variety will produce a much larger crop, if a few trees of pollinating varieties are inter-planted at intervals. For the slightly self-sterile and self-sterile varieties, two or more pollinating varieties inter-planted will make the difference between a financial success or failure of your orchard.

**PLANT LARGE SIZE FRUIT TREES
for QUICK RESULTS**

\$ START A ROADSIDE MARKET \$
Grow your own fruit and sell it locally.
A little investment yields a big profit.

HARRISON GROWN FRUIT TREES IN WORCESTER COUNTY, MARYLAND, ARE CERTIFIED BY THE UNITED STATES DEPARTMENT OF AGRICULTURE TO BE "FREE OF VIRUS DISEASES." WE SHIP TO ALL OF THE 48 STATES AND CANADA.

Roadside Marketing

A GOOD SIDELINE

A sure and economical way to satisfy your customers with tree ripened fruit for fresh eating, table use and home canning as well as fresh freezing.

Roadside fruit stand with a small orchard will make a much higher net cash profit, than generally a large size farm.

HALE HARRISON BRILLIANT PEACH

Harrisons' Super Selected Trees

with their unusual substantial root system, are proving again and again that "bud selected" strains spell yearly profits to orchardists and commercial planters.

**G. HALE HARRISON
GRADUATE OF HORTICULTURE
CORNELL UNIVERSITY**

Many growers also sell apples, pears, plums, strawberries, cherries, apricot & nectarines on their roadside markets.

**A Neat Roadside Market.
With A Large Parking Area.**

HALE HARRISON BRILLIANT PEACH

Has "EYE and TASTE" Appeal.
"IT IS THE BEST".

A GENEROUS SUPPLY OF PEACHES CAN BE MAINTAINED OVER A 12 WEEKS PERIOD BY PLANTING HARRISONS' SUPERIOR SELECTED VARIETIES.

New! Exclusive!
Sensational!
YELLOW FREESTONE

RIO OSO GEM

The World's Greatest Peach

**ORIGINAL STRAIN
 AT NEW
 LOWER
 PRICES**

**HARRISON
 BROTHERS,
 BERLIN,
 MARYLAND**

The sensational Peach which has caused the greatest amount of favorable reports of any Peach introduced in a half century is that marvelous, big Peach, the World's largest, being a patented variety, the Rio-Oso-Gem, U. S. Plant Patent No. 84. It has now been fruited in all Peach-growing districts in the United States and Canada, and has definitely proven itself to be the best all-around commercial Peach. Ask any man who has grown the Rio-Oso-Gem.

THE BEAUTIFUL GLORIFIED PEACH

This beautiful Peach has a brilliant, bright red color, running around 95% good red, whereas they are easy to pack as U. S. Fancy grade. The size of the Peach is all that anyone can expect, as many of these Peaches will run a pound or more in weight and in many instances have been reported that the crop would average three-quarters pound per Peach. The flaming, beautiful bright red color in the cheek, along with an attractive orange-colored background, has earned it an envious reputation as being the prettiest Peach grown.

BEST FLAVORED COMMERCIAL PEACH

The unexcelled flavor is better than that of J. H. Hale and Elberta. The enticing flavor makes it a very popular Peach for fresh eating. The rich flavor is retained when canned or preserved. Now recognized as the leading canning Peach in California. Rio-Oso-Gem is the only Peach which can be processed by quick freezing and still retain its firm texture, with its beautiful, rich, golden yellow flesh and the same flavor as when picked. We have quick frozen Rio-Oso-Gem Peaches which were picked and processed on September 1, 1944, which are still holding up in excellent condition.

RECORD BREAKER FOR LONG DISTANCE SHIPMENTS

The Rio Oso Gem is the best of all Peaches for long distance shipments and the fruit will stand up longer after being picked than any other variety of Peach in existence. This stupendous variety adapts itself exceedingly well for shipments in refrigerator cars pre-cooled, under standard refrigeration for trans-continental hauls. This is the greatest Peach for shipments on trucks under ventilation, as its hard, firm texture insures arrival in excellent condition.

**NATION'S HIGHEST NET CASH MONEY-MAKER
 RIO-OSO-GEM**

IDEAL FOR HOME ORCHARDS

Starts to ripen 7 to 10 days later than Elberta. Rio-Oso-Gem is a very prolific bearer and dependable annual cropper.

RIO-OSO-GEM IS NO EXPERIMENT

Colonel and Mrs. Frank Sleeter, Round Hill, Virginia, wrote, "We have the land ready for the 800 Rio-Oso-Gem peach trees, 5 to 6 feet for April, 1950 planting. It is a wonderful peach and we have had marvelous results marketing it last year at \$6.00 per bushel, in spite of the low market price prevailing during the summer of 1949."

PROLIFIC BEARER—RIO-OSO-GEM PEACH

Destined to be America's Leading Commercial Peach. Sample of RIO-OSO-GEM Grown in Harrison's Orchards at Berlin, Maryland. Sold only by Harrison's Nurseries in numerous states.

READ WHAT FELLOW GROWERS SAY

We have received several hundred complimentary letters highly praising the Rio-Oso-Gem Peach, U. S. Plant Patent No. 84, from all over the United States, some of the typical remarks are from people such as Fussell-Graham-Alderson Company, Forest City, Arkansas: "We have about 1,000 of Harrison's Rio-Oso-Gem Peach trees from which we have been harvesting the largest and prettiest Peaches I ever saw. We sold our Elberta Peaches, U. S. No. 1 grade at \$2.25 per bushel and we had no trouble in picking the Rio-Oso-Gem Peaches 2 1/4 inches and up which we sold at \$4.00 per bushel, f. o. b. Forest City, Arkansas."

Mr. H. Frank Smith, Prop. Hillcrest Orchard, Dover, Arkansas, writes: "This year's crop convinces me that the Rio-Oso-Gem, U. S. Plant Patent No. 84, is the very finest Peach and has certainly proven such with me. It has very fine qualities as a canner and people go wild about it. It always brings the highest prices for me."

Mr. Charles Heilig, Sewell, New Jersey, Gloucester County, said that the most handsome and the best Peach of the forty years' experience that he has had was his first crop of Rio-Oso-Gem on 400 trees, three years old, from which he picked during early September 324 bushels and which he sold at an average price of \$5.00 per bushel at his farm, grossing him more than \$1,600.00 from this very young orchard. He bought 620 Rio-Oso-Gem trees for planting November, and said his future plantings would be Rio-Oso-Gem.

AMERICA'S MOST FAMOUS PEACH

Mr. E. R. Connor, fruit grower and broker, of Stephen City, Virginia, in the famous Frederick County fruit section, was exceptionally well pleased with his first crop of Rio-Oso-Gem Peaches on his three-year-old trees which he picked during early September. From his 400 trees, three years old, he picked a 300-bushel crop for which he was offered \$3.75 per bushel, f. o. b. Stephen City, Virginia, for the entire crop, but he refused the sale so that he could sell the Peaches in smaller quantities at high prices to his customers throughout the Shenandoah Valley of Virginia and nearby cities. He planted 100 more trees two years ago which had a few Peaches on them this summer. Connor states he wishes he had 5,000 Rio-Oso-Gem Peach trees, U. S. Plant Patent No. 84, planted in his Orchard instead of 500.

RIO-OSO-GEM IS A "MUST" FOR EVERY GROWER

There are still big cash profits in Peaches, provided you grow the right varieties and in the near future you will see where the Rio-Oso-Gem, U. S. Plant Patent No. 84, will be getting more prominence each year. It is predicted that within a decade or so, it will be the most extensively planted commercial Peach in America.

**FINEST FLAVORED
YELLOW PEACH**

The Peach of the Future HALE HARRISON

U. S. Patented **BRILLIANT** No. 814

Sensational! New! Colossal!

Yellow freestone ripening during midseason 3 to 4 days earlier than Elberta. The fruit is nearly fuzzless and has a brilliant cardinal red almost completely covering a golden yellow ground color even when growing in shade in the interior of the tree. Fruit throughout the tree is uniformly large even when unpruned or unthinned. Tree is large, vigorous and rapid grower. Self pollinating, it bears tremendous crops year after year. Very hardy in bud and blossom and highly resistant to brown rot. Keeping qualities are excellent.

FOR HOME OR COMMERCIAL ORCHARD

Whether you are going to plant one tree for home fresh eating, canning or freezing or one thousand trees for a commercial orchard, we unhesitatingly recommend Hale Harrison Brilliant as the best peach to plant. It will give you more pleasure to eat or more profit in growing than any other peach known today.

WILL REPLACE ELBERTA

For many decades Elberta has been the standard peach of the world by which all peaches have been judged, tests and observations by leading peach authorities confirm our belief that the new sensational Hale Harrison Brilliant surpasses the Elberta in every way.

OUTSELLS AND OUTBEARS

Hale Harrison Brilliant outclasses them all. It is really the one peach that has everything. Its beautiful attractive appearance, huge size, superior delicious flavor makes it have extraordinary favorable eye appeal, resulting in higher prices. This combined with its BUMPER crops, "Original tree has produced over twenty bushels a year" make it the outstanding moneymaker.

WIDELY ADAPTED

Hale Harrison Brilliant has been planted in forty-two states. Reports from these plantings prove it is equally as adaptable to the far south as it is in central and western areas and it even produces highly satisfactorily in Canada and other northern peach sections.

LONG PICKING SEASON

One of the finest features of Hale Harrison Brilliant is its early coloring, the golden yellow ground color appears weeks before it begins to ripen, this is the one peach that has a high sugar content even when it is hard. Fruit growers have been amazed at its ready to eat coloring and general smooth skin appearance several days before it is ready to pick and ship, this means a long picking season. Records show that it surpasses in keeping qualities any other peach on long distance shipments.

HARRISONS AMAZING GUARANTEE

Several years of testing in co-operation with leading fruit authorities convince us as to the outstanding merits of Hale Harrison Brilliant that we can make the following guarantee.

"Each and every Hale Harrison Brilliant is a true reproduction of the original strain, it will produce more satisfaction to you than any other peach variety that ripens during its season, on proper proof of failure to do this we will furnish you without charge an equal number of peach trees of any other variety that you desire."

Back of this guarantee are the resources of Harrison Brothers Nurseries with an enviable record of seventy-two years in the Nursery and Orchard business.

DISCOVERY OF THE HALE HARRISON BRILLIANT

This sensational new peach was discovered by Mr. Oscar F. Jones, near Crozet, Virginia in the famous mountainous Albemarle County section. He was manager for more than 30 years for the A. C. Bruce orchards, who planted many thousands of Harrison grown peach trees, starting in 1902. A life long horticulturist, he is a pioneer in one of the largest peach growing districts of the United States.

WHAT PROMINENT GROWERS SAY

Mr. C. Purcell McCue, Greenwood, Virginia—"Personally, I feel this peach will replace ELBERTA in this section."

Mr. C. E. Starkweather, Crozet, Virginia—"It bears larger, better colored peaches even with a heavier crop than the Elbertas do."

Mr. Lee T. Carpenter, Louisa, Virginia—"If it proves out in tests as good as it is in its original habitat I consider it to be the greatest find since Elberta in the 1870's."

Nininger Orchards, Roanoke, Virginia—"The parent tree of this peach is the largest and the most prolific I ever saw and when it is loaded with those large, uniform fruit, one hundred per cent colored it is a sight to be remembered."

Mr. Edward D. Daugherty, Crozet, Virginia—"I know something of the HALE HARRISON BRILLIANT and consider it a very unusual variety which will soon replace Elberta if properly distributed and advertised."

Mr. H. P. Rhodes, Winchester, Virginia—"The 500 Hale Harrison Brilliant peach trees I got from you and planted during November of 1949, that 498 are growing and have made a tremendous growth with dark green, healthy leaves and sturdy limbs. I was over to Crozet this summer and got three bushels of this amazing peach from Mr. Oscar Jones, they were off of the parent (16 years old) tree, which had probably twenty bushels which he sold off the tree for \$4.50 per bushel. They were the most perfect example of a very large, delicious firm peach I have ever seen. Will eventually replace Elberta. I want to plant another block, as I believe and all of the fruit men of Winchester, Virginia agree with me, that this peach is the answer to a fruit grower's prayer."

Several hundred half-bushel cell type paper cartons of HALE HARRISON BRILLIANT peaches grown in Northern Virginia were shipped during August 1955 from New York City by steam-ship under refrigeration to Buenos Aires, Argentina, South America, being twenty days in transit. Peaches arrived in GOOD CONDITION bringing FABULOUS PRICES.

Ripens 3 to 4 days earlier than Elberta. Finest flavored yellow peach.

BETTER FRUITS**

NEWEST VARIETIES' OF PEACHES

Harrisons' "Bud Strains"

Some sixty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding stocks for future orchards in America and true-to-name varieties were assured.

This is Your PROTECTION

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

TRUE TO NAME

➤ **CORONET.** Most popular very early ripening peach, CORONET—newest variety cross between Hale Haven and Dixigem. Ripens 3 days earlier than Dixigem and Jerseyland also week ahead of Redhaven. About three-quarters of peach, bright, attractive red blush over good yellow background color. Flesh is yellow, firm, smooth texture, good flavor, medium size, nearly Freestone. Introduced by U. S. Dept. of Agriculture as the ideal variety to plant in future orchards in place of Dixigem.

➤ **REDCAP.** Very new popular variety. Just introduced by U. S. Dept. of Agriculture. Cross between Southland and Dixired. Ripens one or two days earlier than Dixired, which it resembles. Attractive bright red blush covering three-fourths of medium sized, clingstone peach. Flesh is yellow, firm with good flavor. Recommend planting Redcap in place of Dixired.

➤ **CARDINAL.** New variety, an offspring of Hale Haven, which ripens four days ahead of Dixired and week earlier than Red Bird. Attractive red blush over good yellow ground color, with smooth skin. Flesh is yellow, firm, clingstone, medium textured and good flavor. About size of Dixired, also in color, appearance and firmness. New variety just introduced by U. S. Dept. of Agriculture with surprising popularity in the South.

➤ **HILAND.** New variety cross between Southland, Hiley and Hale Haven. Ripens two days earlier than Cardinal, also five days ahead of Dixired, being eighteen days earlier than Red Haven. Attractively red colored, flesh is yellow, fairly firm, clingstone, medium size, good flavor. Introduced by U. S. Dept. of Agriculture.

➤ **TULIP.** Very early. New variety originated by Missouri Fruit Experiment Station. Ripens at same time as Dixired and Redcap being six weeks earlier than Elberta. Medium to large size nearly round with good red color even before picking time, flesh, yellow, firm, fine texture, excellent flavor, free-stone. Stands shipping well.

➤ **SHINN'S DELICIOUS.** A true mutation, being very early ripening budspout strain of Burbank July Elberta, U. S. Plant Patent #15, discovered by Mr. C. T. Shinn and Mr. L. S. Smith in their orchard near Russellville, Arkansas. Identical in large size, beautiful red color with handsome golden yellow background color, yellow flesh, freestone and superior flavor as its parent, however, its most appealing characteristic is that it ripens three weeks sooner, between Red Bird and Red Haven, making it about five weeks earlier ripening than Elberta. Many growers say it is better than Starking Delicious peach U. S. plant patent #806.

➤ **REDCREST (N. J. 126).** New, attractive, large, firm, yellow, freestone peach. Ripens seven days earlier than Elberta.

➤ **M. A. BLAKE (N. J. 117).** New midseason peach. Medium to large size, good coloring, firm, yellow, freestone. Ripens four to five days earlier than Elberta.

➤ **HALE HARRISON BRILLIANT (U. S. Plant Patent 814).** See description on page 5.

➤ **SUNRISE (N. J. 133).** See description on page 8.

➤ **GOLDRAY.** See description on page 8.

➤ **RANGER.** See description on page 9.

➤ **REDSKIN.** See description on page 12.

➤ **AUTUMN (N. J. 145).** See description on page 13.

➤ **N. J. 137.** Promising, very early ripening, new variety, still to be named. Large size, bright red blush, yellow, ripens between Sunrise and Jerseyland.

➤ **KEYSTONE.** Just introduced by U.S. Dept. of Agriculture. Cross by Newday and Southland. Ripens between Golden Jubilee and Triogem. Fruit is medium-large size, round, high red color with bright golden background color. Yellow flesh, firm, smooth texture, good flavor, freestone. Trees are vigorous and productive.

NURSERY MANAGER
Personal supervision of growing and digging

NEWEST VARIETIES OF PEACHES

TRUE-TO-NAME

ONCE PLANTED, HARRISON PEACH TREES TAKE ROOT AND DEVELOP VERY RAPIDLY—THEY ARE QUALITY BRED, READY FOR EARLY FRUITING.

JULY HEATH (OTHELLE CLING). Midseason, about 10 days before Elberta. White fleshed, clingstone, large, red skin color. High quality fruit and hardy in fruit bud and wood. Dependable cropper and standard for a white cling type peach.

FRANK. Late, 10 days to 2 weeks after Elberta. Yellow fleshed, clingstone, large, attractive peach for a late variety. Good quality fruit. Especially dependable bearer over a wide area. Has been a popular variety for many years in Texas where it originated.

MAYGOLD. New variety, cross between Sunhigh and Southland. Ripens three days earlier than Dixired. The fruit is clingstone; medium sized, red blush, yellow ground color, yellow flesh, good flavor. Trees are vigorous and productive. Very low chilling requirements for fruit and leaf buds. Should be planted in the "Deep South". Available for November 1958 planting. The earliest ripening peach.

POPPY. New, mid-season, cross between Frank and Hale Haven. Introduced by Missouri Experiment Station. Yellow, freestone, large, fine texture, and fine flavor. Ripens 8 to 10 days earlier than Elberta, which it resembles. Peach appears to be ripe a week or ten days before it actually reaches the hard ripe stage. Good shipper. Trees available for November 1957 planting.

SUNHAVEN. New variety just introduced by Mr. Stanley Johnston of the South Haven, Michigan Experiment Station. Cross Redhaven by J. H. Hale and Hale Haven. Ripens 10 days earlier than Redhaven, which it resembles in red color. Very early. Fruit is medium-large size, nearly round and uniform in shape. Skin color is much like Redhaven. Largely high bright red with enough bright golden background color for attractive appearance. Yellow flesh, fine-textured, firm, good flavor. Freestone when fully ripe but otherwise a partial cling. Trees hardy, large, vigorous and productive. 10¢ extra per tree. Available for November 1958 planting.

REDGLOBE. New, just introduced by U. S. Dept. of Agriculture. Early mid-season, yellow freestone, medium to large, bright and attractive red color. Firm, fine-textured flesh, good in flavor. Ripens about 16 days earlier than Elberta.

LATEROSE (N.J. 109). Late, white, freestone. Large, ripens 10 days later than Elberta. Excellent for home canning and freezing. Tree hardier than Elberta.

LORING. New, mid-season, cross between Frank and Hale Haven. Introduced by Missouri Experiment Station. Yellow, freestone, large, firm peach. Ripens 10 days earlier than Elberta. Fruit most nearly resembles Golden Jubilee.

ALAMAR (U. S. Plant Patent 930). New variety recently introduced. Late, yellow, freestone, skin yellow with very high red blush. Pit small. Excellent long distance shipper. Ripens about a week earlier than Rio Oso Gem, which it most nearly resembles. An excellent variety for commercial canning and freezing. 15¢ extra per tree. Available for November 1957 planting.

EARLY EAST (N. J. 134). Very early, cross between J. H. Hale, slappy by Admiral Dewey Yellow, freestone when tree-ripe, medium to large, firm, skin attractive red. It is hardy and productive. Ships well as commercial peach. Ripens 10 days earlier than Golden Jubilee. Trees available for November 1957 planting.

RICHHAVEN. New variety just introduced by Mr. Stanley Johnston of the South Haven, Michigan Experiment Station. Cross Redhaven by J. H. Hale and Hale Haven. Ripens 2 to 3 days earlier than Hale Haven. Early mid-season. Fruit is large, nearly round and uniform in size and shape. Large bright red blush on area exposed to sun with stripes of red and gold for the background color. Very attractive in appearance. Yellow, freestone, unusual thick tough skin adds to the handling and shipping ability of the fruit. Tree hardy, vigorous and productive. 10¢ extra per tree. Available for November 1958 planting.

YOU CAN PLACE YOUR ORDER WITH US WITH COMPLETE CONFIDENCE. It is our earnest desire that each and every one of our customers be fully satisfied in their dealings with us. If you are not and feel that it is our fault in any way, please write to us. No transaction is complete unless you are completely satisfied.

Terms—Net Cash

Remittance with order, by check, money order or draft. We will ship C. O. D. provided a deposit of one-fourth amount of purchase price is sent with order. All nursery stock priced f. o. b. Berlin, Maryland.

Money Back

In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter.

HARRISON'S—GROWERS OF THE BEST NEWEST VARIETIES

Biggest Peach Tree Values in America

HERE'S A "LOAD" OF REASONS WHY HARRISON'S PEACH TREES ARE BETTER

- A—Our organization has over 70 years' experience.
- B—Every step in growing under the personal supervision of the Harrison Brothers.
- C—Thousands of trees in orchards from which our propagating trees are selected.
- D—Use of modern methods for planting, cultivating and digging.
- E—Over 4,000 acres of various types of soil.
- F—Ideal soil and climatic conditions.
- G—Co-operation with leading horticulturists and experimental stations all over the world.

Very Early Varieties

➤ **DIXIRED.** Very early, yellow, cling, medium size, round, bright attractive red blush; good flavor; prolific bearer. Ripens two weeks earlier than Golden Jubilee or about three days later than Red Bird. A new variety originated and introduced by the U. S. Department of Agriculture. Its most outstanding commercial feature is that it is a good shipper and has been planted extensively in Georgia to meet the demands for the very early Peach market.

➤ **DIXIGEM.** Early, yellow, semi-freestone, red blush, medium size, good quality. Ripens a few days sooner than Golden Jubilee. A new variety originated and introduced by the U. S. Department of Agriculture. Extensively planted in Georgia.

➤ **SUNRISE (N. J. 133).** Very early. Attractive, well colored, firm medium sized, yellow fleshed, semi-freestone peach. Ripens just after Dixired and a few days earlier than Red Bird.

➤ **JERSEYLAND (N. J. 135)** — Ripens a week sooner than Golden Jubilee, large, firm, attractive yellow flesh, freestone. Tree is hardy, sets buds freely. Introduced by New Jersey Experiment Station.

Plant Big Peach Trees For Quickest and Best Results

ERLY-RED-FRE—Very Early Large Peach, Commanding High Prices

➤ **ERLY-RED-FRE.** U.S. Plant Patent #320. Very Early. Highly colored with an attractive bright red blush on a creamy white background. White fleshed, almost freestone. Large size fruit, fine quality with good flavor. Ripens three days later than Red Bird. Tree originated as a "chance seedling". Thrifty grower, hardy in fruit buds being a heavy bearer. Universally recognized as one of America's Greatest Early Commercial Peaches.

➤ **RED BIRD.** Bright glowing color—"red as fire"—on a background of creamy white. Handsome. Large—as large as Elberta. Ripens about 40 days before Elberta. Clingstone.

➤ **GOLDRAY.** New, very early variety. Red-bud sport strain of Golden Jubilee. Ripens two weeks earlier than its parent and at the same time as Red Bird. It is a "Bud Mutation" discovered in the orchard of Mr. J. Roy Cunningham, Lancaster, South Carolina, a customer of Harrison's. Identical in color, size, shape and fine flavor and delicious eating quality of Golden Jubilee, except that Goldray is semi-freestone.

➤ **JUNE ELBERTA.** A big handsome red and gold Peach, highly colored, excellent quality and a dandy home early Peach.

HARRISON'S HARDY PEACH TREES

We absolutely guarantee Harrison-grown Peach trees, variety for variety, to be as hardy or hardier than trees grown in any locality north of us.

HARRISON—A Name in Trees You Can Trust

REDHAVEN PEACH
They Taste
as Good as
They Look

The Sensational REDHAVEN

Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

THE NEW EARLY RIPENING YELLOW PEACH THAT RIPENS ABOUT 5 DAYS BEFORE GOLDEN JUBILEE

The most promising early ripening yellow freestone Peach ever introduced. A cross between Hale-Haven and Kalhaven made at the South Haven, Michigan, Experimental Station. Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens. Bears heavy crops and should be thinned for best results. Every grower should try REDHAVEN. We have a good supply of genuine Redhaven trees this season. The demand for this variety is heavy, so order early.

TRIOGEM PEACH—Bears Large Crops

TRIOGEM (N. J. 70)

Developed by the Master Plant Breeders of New Jersey
MEDIUM TO LARGE, FIRM, ATTRACTIVE

Ripens early, medium to large, oval, firm, high quality, high red color over entire Peach, yellow flesh; freestone, smooth, nearly fuzzless like J. H. Hale, one of its parents; colors several days in advance of its ripening, being 2 days later than Golden Jubilee, or 3 weeks earlier than Elberta. This, combined with its very slow rate of softening, makes it an ideal Peach for commercial growers. Hangs well to the tree after the Peaches become firm ripe. When picked hard to firm it is a good long distance shipper. This is the best commercial Peach ripening at this period, and is being planted now by some growers in preference to Golden Jubilee. Considered as the best new variety of Peach so far originated and introduced by the New Jersey plant breeders.

AND
LIVE LONGEST**

A REAL PROFIT MAKER

TRIOGEM has been fruited commercially in New Jersey and Maryland for several years. During this time it has topped all varieties in price on the New York and Philadelphia markets which ripen at this time during the summer. Several large commercial orchards have been planted with Triogem and its popularity is increasing each year.

SOUTH HAVEN. Early mid-season, yellow, large, handsome, deep yellow with red cheek, freestone. Peaches of uniform size, delicate in flavor. Ripens 15 to 18 days ahead of Elberta. Trees are very hardy and productive. Adopted to cold climates and produces bumper crops in mild climates.

NEWDAY (N. J. 79). A bright, showy, good quality, yellow, semi-clingstone peach. Ripens with Triogem (N. J. 70).

RARITAN ROSE (N. J. 97). Extremely hardy, white flesh, nearly freestone, large size, high red color with good flavor. Ripens a few days earlier than Golden Jubilee. Excellent peach for home and local market.

GOLDEN JUBILEE. Early—Fruit bright deep yellow, medium to large size, oblong shape. Good size, fine appearance and excellent quality with delicious flavor. Ideal for roadside stands and home orchards, also commercial orchards for nearby city shipments. It ripens about ten days earlier than Hale-Haven.

RANGER. A fine yellow freestone, ripening at same time or just after Golden Jubilee. Beautiful peach. Very hardy, new variety, bears big crops when some other varieties under same weather conditions have light yields. Introduced by U. S. Dept. of Agriculture.

HERE IS THE HIGHLY FLAVORED EARLY WHITE FREESTONE PEACH YOU HAVE BEEN LOOKING FOR

CUMBERLAND

An outstanding favorite early white Peach. Is a comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Golden Jubilee.

GOLDEN JUBILEE PEACH—Yellow, Excellent Quality

A GREAT PEACH COMBINATION—REDHAVEN, TRIOGEM, HALE-HAVEN

Hale Haven Extra Large

Harrisons' Peaches

ARE A COLLECTION OF
THE WORLD'S BEST

HALE-HAVEN

Early midseason. Ripens just after Golden Jubilee has been harvested and about 14 days ahead of Elberta. Yellow freestone, large, high red color, firm, fine flavored. It takes on red color early and the peaches show good red color several days before ripening, which gives it a distinct advantage for marketing. When allowed to ripen fully upon the trees its flavor is undoubtedly the best of any yellow Peach. Tree is an extra strong grower and produces a bumper crop of fruit each season. Very hardy in fruit bud. One of its parents is J. H. Hale, from which it inherits its large size and fine color. The other parent is South Haven from which it attains hardiness, large crops yearly and strong growth. It is the best variety ripening just after Golden Jubilee and should be planted in every orchard. Excellent for fresh eating and quick-freezing.

BURBANK JULY ELBERTA U.S. PLANT PATENT NO. 11

The Outstanding Medium Early Commercial Peach

Here is the peach that has caused a sensation wherever fruited. Growers in many sections say it is their best medium early, yellow, freestone peach for shipping, local markets and home use. Beautiful golden yellow, almost completely overspread with brilliant red. Ripens about the same time as Hale Haven, but on account of its vivid red color and yellow background with no green color, it can be picked for commercial shipments about four days sooner. Excellent in flavor, even superior to Hale Haven for fresh eating, freezing and canning. Hardy, sure cropper, large size, a sensational money maker. July Elberta is known by different names, such as Burnett Elberta, Burbank July Elberta, Kim Elberta, Burbank Elberta. We offer an outstanding strain selected from bearing trees. Season of ripening about two weeks sooner than Elberta (Original Strain).

POLLY. Early mid-season. A large, white flesh, red blushed, freestone, with a real sweet taste of excellent flavor. Trees will withstand temperatures of twenty degrees below zero and still produce big crops of peaches. Ripens about ten days earlier than Elberta. Polly is the peach to plant in the far-North.

AMBER GEM CLING. Midseason, long medium size, beautiful color with deep red blush, firm flesh. Delicious honey-sweet flavor. One of the best canning varieties. Tree hardy and a good cropper. Now being planted extensively in Virginia and Michigan for canning factories. New canning peach. Ripens same time as Hale-Haven.

FAIRHAVEN. Early mid-season, yellow freestone, medium large, nearly round, mostly bright golden in color with an attractive bright red cheek. Skin is smooth and very tough. Fruit very firm and ships exceptionally well. Ripens 7 days after Golden Jubilee.

CHAMPION. A Good Home Peach. White, freestone, very large; creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside Peach, it is one of the best. Tree is hardy, large grower and productive. Ripens ten days earlier than Elberta.

SUNHIGH. (N. J. 82.) A large, red, bright, smooth Peach which colors well all over before it ripens, softens slowly, making it a good commercial Peach. Flesh inclines to adhere to the pit when hard ripe. The variety seems to do best in hilly sections and requires thorough summer spraying. The fruit is large, roundish; thick-skinned, very uniform in size. Color deep yellow with red cheek. Stone is free. Ripens approximately 18 days before Elberta, at a time to bring high market prices.

HILEY. White. Early midseason. Bears huge crop of fancy Peaches. Freestone, medium size, highly red colored and is a very handsome Peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. Hiley resembles Belle of Georgia but ripens about 14 days earlier.

SOUTHLAND. Early midseason, yellow, freestone, medium to large, round, attractive red blush with mild, good flavor. Originated by the U. S. Department of Agriculture, being an ideal peach for the extreme Southern peach Belt. Vigorous tree, productive and fruit ripens at the same time as Hiley. Promising commercial peach.

SUMMERCREST. (N. J. 94.) Midseason, yellow, freestone, large with red blush and sweet flavor. Trees exceptionally vigorous, fruit ripens the same time as Belle of Georgia, which is a few days earlier than Elberta. Popular in New Jersey where it is known.

GOLDEN EAST. (N. J. 87.) Early midseason. Very large, high red color, yellow, freestone. Very good flavor. Ripens 15 days earlier than Elberta. Good roadside market and commercial Peach.

INCREASES YOUR PROFITS AT NO EXTRA COST

For Greater Profits From Your Land Plant Trees

NATIONAL J.H. HALE *Reputation*

Originated by the late PEACH KING

MIDSEASON—Ripens 2 to 3 days before Elberta.

Original Strain J. H. HALE

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored Peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Elberta or Hiley or any other variety of Peaches along with Hale for cross-pollenization.

Extra Large Size Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about two or three days prior to Elberta.

J. H. HALE—Giant
Size, Enticing Flavor

Belle of Georgia

The Queen of Flavors

THE BEST WHITE MID-SEASON VARIETY

Ripens midseason. Color creamy white with red cheek. Flesh white, red near pit. Size large, freestone. Belle of Georgia, for some time, has been recognized as the best all-around white Peach on the market. It is easily the best shipping white Peach

Early Elberta

Midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blushed with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor; rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning. Gleason strain which ripens three days earlier than Elberta.

The Finest Flavored
White Peach

SULLIVAN EARLY ELBERTA

An Early Ripening Red Bud Sport of Elberta
MIDSEASON YELLOW—FREESTONE

Here is the early ripening strain of original Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to Genuine Elberta in every characteristic except it ripens about seven days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

10 OUTSTANDING REASONS FOR PLANTING SULLIVAN EARLY ELBERTA

- 1—Size: Large to Extra Large.
- 2—Yellow Freestone.
- 3—Rich, Sweet Flavor.
- 4—Brilliant Red Colored with Golden Yellow Background. Excellent Long Distance Shipper.
- 5—Tree Vigorous Grower.
- 6—Bears Large Crops Annually.
- 7—Colors a Week Earlier Than Elberta.
- 8—Ripens Slowly After Being Picked.
- 9—Brings Highest Market Prices.
- 10—Completely Tested.

7 **GAGE ELBERTA.** "Bud Sport" of Elberta, disease resistant. Tree is just as vigorous as original Elberta, but instead of growing upright, its branches are more of spreading nature. Due to high resistance to bacteriosis, the tree retains its foliage and the fruit ripens 3 to 4 days later than Elberta.

ELBERTA

(ORIGINAL STRAIN)

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any Peach. It has been the standard for all other Peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

ELBERTA
Original Strain
The Leading Peach
America's No. 1 Peach—Elberta. There are more Elberta Peach trees in bearing than any other variety on earth.

Save Disappointment—Plant Only Harrison ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of \$1.00 to \$2.00 per bushel on the New York and other leading fruit markets.

They Cost No More

Why plant degenerated strains of Elberta when you can plant Harrison's heavy yielding original strain trees. They can be purchased at the lowest price that high quality trees can be produced for. It is true trees, size by size, can be produced cheaper by budding them from non-fruiting trees in the nursery row, but this method causes degeneration. Trees grown in this manner will be lighter croppers and require a longer time in coming into bearing.

7 **REDKIN.** A new variety introduced by the University of Maryland. Mid-season, yellow, freestone, large, round, deep red blush, firm flesh, sweet flavor. It is a cross between J. H. Hale and Elberta, which ripens slightly earlier than Elberta. Vigorous, good growing tree and productive.

Brackett

*Mid-Season
Late*

1. Size
2. Quality
3. Color

A Profitable Commercial Variety Slightly Later Than Elberta
Brackett is a comparatively new commercial Peach in some sections but wherever tried it has given uniformly good results. During the past thirty years we have planted many thousands of this variety in but wherever tried it has given uniformly good results.

The fruit is rich yellow, with dark carmine cheek. The size runs fully as large or larger than Elberta. Flesh is deep yellow, extremely juicy and is absolutely freestone. Fruit is much better flavored than Elberta. Good shipper.

Popular On the Markets

Brackett commands unusually high prices on the market and often outsells Elberta twenty-five to fifty cents per bushel. We know the grower who needs a Peach ripening slightly later than Elberta will make no mistake in planting Brackett.

Plant Harrison's Original Strain

HARRISON'S were the first to popularize this great variety and distribute it throughout the Peach-growing sections. We offer trees that are propagated direct from the original strain and they are sure to produce results.

BRACKETT—The Beautiful Red Peach With Honesome Orange-Lemon-Colored Background

Peaches

Genuine

SHIPPERS LATE RED

Midseason-Late. Large, round, yellow, freestone, very attractive with high red color. It is a Hale type of Peach, having good quality and brings high prices on the fruit markets. Ripens three days later than Elberta. A good commercial Peach as it is a prolific bearer of large size, highly red-colored Peaches and is a favorite wherever planted. Harrisons are growing the original strain of Shippers Late Red which is far superior to other types and strains of this variety. Should be planted in every commercial orchard, as well as home orchards. Dependable trees which are absolutely "true to name."

Harrisons' Maryland Grown Peach Trees are the Finest Quality in the World

SHIPPERS LATE RED PEACH

WHITE HALE (N. J. 63). Late. Large to very large, red blush, white-fleshed, hard to firm, freestone of good quality. Ripening seven days later than Elberta.

AUTUMN (N. J. 145). Late. Cross between J. H. Hale, Eclipse and Late Crawford. Ripens 14 days later than Elberta. About 50% red color with greenish under-color, large, yellow, freestone, good quality.

LIZZIE PEACH

RIO-OSO-GEM. Late. See page 4 for description and prices. Starts to ripen 7. to 10 days later than Elberta.

AFTERGLOW. (N. J. 84.) Late midseason. Yellow, freestone, large, round with high red blush, ripens about 5 to 6 days later than Elberta.

VERY LATE RIPENING VARIETIES

KRUMMEL'S (Krummal's Late October). Yellow, freestone; extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor.

SALWEY. Very late. Yellow, freestone.

WHITE HEATH CLING. Large, late cling, fine flavor, good home Peach.

Late Ripening Varieties

LATE ELBERTA. (Gemmer's Late Elberta.) Late, yellow, freestone, large, high red color, fine quality, good shipper. Is a typical Elberta in fruit and tree characteristics, but ripens 4 to 5 days later than Elberta of the original strain.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 14 to 16 days later than Elberta, having same prominent coloring characteristics as its parent.

73 YEARS LARGEST GROWERS OF HIGH QUALITY TRUE-TO-NAME PEACH TREES IN THE WORLD

HARRISON'S AMERICA'S BEST VARIETIES famous PLUMS

ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BIG MACKAY. Late. Largest and best Damson, being an improved strain of Shropshire Damson. Freestone. Deep purple, juicy, rich flavor; small stone. Fine for preserving. Easy to grow, produces immense crops. Should be planted in every orchard. Large size fruit makes ideal jams, preserves and jellies. An excellent variety for fresh fruit shipments to city markets, always demanding high prices.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FORMOSA. A midseason variety of excellent and prolific bearing qualities. Large greenish yellow, overlaid with red. Alternate bearer. Heavy cropper.

ITALIAN PRUNE (Fellenberg). Late, medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE PRUNE. Late. Commercial variety. Purplish black, juicy, sweet, excellent for cooking.

LOMBARD. Midseason. Medium size, showy purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

MONARCH. Very large, bluish purple. Juicy, golden green flesh. Bears early and abundantly. Excellent for market.

BRADSHAW. Very large, fine early Plum; dark violet-red, juicy and good. Very productive; valuable for market. Quality is excellent, color attractive. Good canner.

METHLEY. A recent introduction which is rapidly gaining popularity due to its fine quality and handsome appearance. The fruit is medium to large in size, reddish purple in color with red flesh. It is juicy, sweet and of distinctive flavor. The tree is vigorous and upright in growth habit. Does well on most types of soil and is a heavy annual bearer.

RED JUNE. Early, medium size, garret-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market Plum.

BRUCE. Early, good size, very firm, fine quality. Beautiful bright red color with yellow background. Very productive. Popular in Southern States. Plant another variety with Bruce for pollination.

SATSUMA. Midseason. Best flavored semi-freestone, blood-flesh Plum known. Large size. Flesh dark purplish red, juicy, sweet, possessing an alluring aroma. Originated by Luther Burbank.

SHIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Midseason. Freestone, large, new Prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

WICKSON. Midseason. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of yellow Plums.

Extra Good Fruits for The Home Garden

APRICOTS

The Apricot is one of the most delightful luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early Cherries and before the best early Peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large, prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

APRICOTS CAN BE GROWN ANYWHERE PEACHES SUCCEED

NECTARINES

Delicious for Eating

There is a mistaken idea that the Nectarine is a cross between the Peach and something else, while it is really nothing more or less than a smooth-skinned Peach. The melting, juicy texture of the Nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow, freestone.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

CAVALIER. New mid-season, large, yellow freestone.

GARDEN STATE. Large, firm, yellow freestone.

WILLIAMS' EARLY RED

The Big Red Home or Market Apple

Just at the time when people are hungry for a fresh, new red Apple, this superb sort comes into market. In New York, Boston, Philadelphia, and other eastern cities as well as middle western and southern cities, the fruit sells as quick as it hits the market—house or dealer's store. It holds its own anywhere and has proven to be—

The Best Summer Apple

The rich bright red fruit catches the buyer's eye and is ordered at a price that yields the grower a good profit. Apple is large, with tender, crisp, white flesh, juicy, slightly tart. The trees come to bear when quite young, producing freely and steadily. Fine for a filler or permanent tree, and being hardy, can be successfully grown in New England states and Canada. All orders should include Williams Early Red.

A good pollinizer for Red Yorking and Red Rome Beauty Apple trees.

SUMMER APPLES

LARGE TRANSPARENT (Lodi)

A New Summer Variety

Ripens Very Early—Destined to Replace the Ever-Popular
Yellow Transparent

We believe there is a big future for this new summer Apple. Our commercial friends should lose no time in anticipating the demand for an Apple of this type.

Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white flesh, of medium size. A good pollinizer.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that's what we mean. It can be done—here's why: Yellow Transparent Apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easy on its big brother, "Large Transparent" which ripens at the same time.

Large Transparent Apples Average Up to 1/2 Inch Larger Than Yellow Transparent—This Means \$1.00 to \$2.00 per Bushel Extra

OTHER SUMMER APPLES

➤ **STARR.** Large, attractive with bright yellowish, smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

➤ **MILTON.** Very handsome, McIntosh type. Fruit a beautiful pinkish red with tender, crisp, white flesh of excellent flavor. Ripens a month earlier than McIntosh Red.

➤ **TWENTY OUNCE.** Very large, fine quality, yellow striped red.

➤ **WEALTHY.** Medium to large size; round, almost solid red; flesh white or a little stained, tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

➤ **EARLY MCINTOSH.** Resembles its McIntosh parent in appearance, but is less aromatic. An attractive, uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and bear annually if thinned early and severely. The shape and framework of the tree, especially the heavy-butted branches, are like those of McIntosh. The crop ripens ten days later than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

➤ **RED SUMMER RAMBO.** A new earlier coloring solid red strain means much greater profits for growers everywhere.

➤ **SUMMER RAMBO.** Large, splashed with red.

➤ **EARLY RED DUCHESS.** Highly colored early Apples bring premium prices. This bud sport colors red all over early in the summer. Excellent pollinizer for Red Gravenstein.

➤ **YELLOW TRANSPARENT.** Medium size, greenish yellow, very heavy bearer. Most widely planted yellow variety.

➤ **RED GRAVENSTEIN.** See description page 19. Excellent summer apple.

Plant Harrison's Bud-Selected, Heavy-Bearing
Strains.

Harrisons' APPLE TREES

for the APPLE INDUSTRY

Early Coloring Means 100% Perfect, Extra Fancy Grade

BRILLIANT RED DELICIOUS Newest "Red Bud Sport"

The apples start taking on red color during early August or the middle of August, depending on the section of United States that the tree will be planted.

The solid red coloring at maturity is excellent and attractive, being a big improvement over the Richared, which it resembles in size and shape.

Brilliant red fruit with excellent flavor. A beautiful new apple. Similar to Royal Red Delicious. A good growing tree, 25¢ extra per tree. One year budded trees are available for Spring 1958 planting.

RED SUMMER RAMBO

BIG YIELD STRAIN

A new "Red Bud Sport" strain which has very early red coloring during July and develops into a solid red colored apple. Extra large size fruits with a rich mild flavor. A tremendous bearer.

A customer in Virginia picked 1,184 bushels per acre. A very profitable and excellent summer apple. Harrisons' strain, being this new solid red color sport, is so superior in appearance to any of its kin that in the future its culture alone should be recommended. Large, very vigorous growing hardy trees.

SPARTAN

A very attractive McIntosh type apple maturing about one week later. Firmer flesh and has excellent dessert quality. Keeps in storage several weeks longer.

Spartan is a cross between McIntosh and Albermarle Pippin (Yellow Newtown). Tree is a good grower and produces bumper crops.

Apple growers in British Columbia, Canada, consider Spartan as one of the finest apples grown and eventually expect Spartan to replace McIntosh.

NERO

Late September, deep red, handsome shading, medium size, of good quality and excellent flavor. One of the longest keepers. Extra-heavy bearer.

NEW LOWER APPLE TREE PRICES ON PAGE 16.

YORK IMPERIAL

A large red apple, a little lopsided, but keeps all winter. A heavy bearer and good quality.

AUGUST RED DELICIOUS

Newest Early "Red Bud Sport"

The red color starts to show on apples during late July or early August, depending on the section of United States that the tree will be planted.

It has good full bright red color during the summer. The new variety has a much better red coloring than Starking Delicious, which it resembles in shape and size.

Similar to Red King Delicious. A good growing tree. Fruit has excellent flavor. 25¢ extra per tree. One year budded trees are available for Spring 1958 planting.

JERSEYRED (N.J. 1)

Late attractive red apple producing extra large fruits. Very firm and stores exceptionally well, as does Red Rome Beauty. A cross between Gallia Beauty and White Winter Pearmain. One year trees available for November 1958 planting.

BRIGHT RED

Stayman 201 Type →

It's Flaming Solid Red

BRIGHT RED STAYMAN—FINE FLAVOR.

BRIGHT RED STAYMAN

New red bud sport with attractive, bright brilliant, solid red color all over the apple ten to twenty days earlier than Stayman Winesap. With 100% red color it is possible to pick and ship two weeks earlier than normal.

TRIPLE RED DELICIOUS—Finest Flavored, Best of All

NEW BRIGHTER

Bear Giant Size, Rich Colored, Fine

A HORTICULTURAL TRIUMPH—UNEXCELLED FOR

TRIPLE RED DELICIOUS—THE BEST King of All Red Apples

Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

AMERICA'S HIGHEST
PRICE APPLE
EXCELLENT FLAVOR

Glorified Red Apple of the World

Ideal for Home Orchards
Harrisons' Triple-Red Delicious is not only a commercial Apple, but it is every bit as well adapted to the home grounds. Whether you wish to plant a thousand or if you have room for only one tree, Harrisons' Triple-Red Delicious will give full value. Very similar to Starking Delicious but colors earlier.

8. Excelled by No Other Red Bud Sports or Strains.
9. No Increases in Price Over Standard Varieties.
10. Greatest Profits.

SOLID RED WINESAP—Fine Flavored, Long Keeper

SCARLET RED STAYMAN BRILLIANT COLOR

We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices

Scarlet Red Stayman is the best general purpose Apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

and BEST RESULTS

SOLID RED WINESAP

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

THE APPALACHIAN WINNER RED YORKING

(U. S. Plant Patent No. 125)

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippenburg, Penna., for use in planting a large orchard about 40 years ago.

SCARLET RED STAYMAN—Tops with Many Growers

RED YORKING—Big Crops

RED VARIETIES

Flavored Apples

HOME OR COMMERCIAL ORCHARDS

RED SPY—Bears Crisp, Juicy Apples

RED ROME BEAUTY

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy Apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size Apples. The tree is a vigorous, strong grower, exceedingly hardy. Pacific Coast strain. Has always been very popular.

NEW STRAINS OF RED ROME

Can supply two new additional red bud sport strains known as C. and O. Red Rome also C. and O. Red Rome number 262.

SUPER RED McINTOSH

A new strain of McIntosh Red that starts coloring earlier and produces a larger percentage of extra fancy fruits. Super-Red McIntosh, when allowed to mature on the trees, is slightly darker in color than our regular improved McIntosh Red. Has all the best qualities of ordinary McIntosh and will mean larger profits for growers who have been unable to get sufficient color. McIntosh has been the favorite in the North; this new strain extends the planting area farther South. The most highly colored solid red strain available, regardless of price. We have some exceptionally good one-year trees and fine two-year trees to offer this season. Plant McIntosh strain of Apples for big profits, equally as good in home orchards as it is commercially.

RED ROME BEAUTY
Quality and Appearance

RED SPY

A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every Apple being solid red in color. We recommend it for commercial and home plantings in northern states.

BRIGHT RED JONATHAN

We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain of Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

RED GRAVENSTEIN

Here is the Apple that has been overlooked by eastern growers. Old-fashioned Gravensteins have been grown in tremendous volume during the past twenty-five years, mostly in California, a few in the Eastern States. The old strain lacks the color to make it sell. Our new Red Gravenstein colors a solid bright red long before it is ripe. The quality of Red Gravenstein is extra good for an early Apple and its ability to carry to distant markets, even after it gets solid red, makes it command the highest prices.

➤ GRIMES GOLDEN

Harrisons' Selected "Big Yield" Strain—Best Home Orchard Apple

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored Apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the best bearers known, producing extra large crops annually. Excellent variety for a filler as it comes into bearing very early. Grimes Golden is the best pollinizer known, especially for Stayman Winesap, Lowry, Baldwin, Cortland, Rome Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

➤ YELLOW DELICIOUS *It's Golden!*

A golden yellow Apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall.

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year. Excellent pollinizer for all varieties.

STAYMAN WINESAP Big Yield Strain. Without a doubt the best yielding strain of Stayman available. This strain yields bumper crops year after year. It covers in red and gets nearly solid red colored when allowed to stay on tree. This is an improved strain and is preferred by many growers in the East. Time-proven by thousands of growers.

➤ MCINTOSH RED

Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North.

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored Apple grown. Recommended for home or commercial orchard plantings.

GRIMES GOLDEN

Big Crops—One of the Best Golden Apples

Harrisons' Maryland Grown Apple Trees are the Finest Quality in the World

OTHER GOOD APPLES

SMOKEHOUSE. Large Apples of superfine flavor, excellent for eating, yellowish green mottled with dull red and with many russet dots; flesh firm, crisp, juicy and aromatic. Tree large, vigorous and reliably productive.

WINESAP An Apple favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored Apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized Apples with plenty of color.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinizer.

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive Apple when packed in bushels, demands good prices, excellent baking Apple. Should not be planted extensively because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel Apple, brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY. Large, round, red, flavor and quality above average.

RED LOWRY. Red bud sport strain, identical with its parent Lowry in all respects with the exception that it has very much higher red color and when matured full red color. It can be picked 2 to 3 weeks earlier than Lowry, due to its earliness in season and color. Interplant a few Grimes Golden as a pollinizer.

DWARF FRUIT TREES

Take Little Space to Produce Big Delicious Fruit

➤ DWARF APPLES

These little trees can be planted 8 to 10 feet apart, and are only 10 to 12 feet high at maturity. Most varieties start producing fruit the first or second year after planting, and the fruit is as large or larger than that from standard trees. Plant two or more varieties for pollination.

Varieties:	Large Transparent	Red Jonathan
	Grimes Golden	Red Delicious
	McIntosh Red	Red Stayman
	Yellow Delicious	Red Rome Beauty

Price: 2-yr., 3-4 ft., \$3.25 each; 3 for \$9.00.

➤ DOUBLE RED BALDWIN. A new dress for this old reliable variety. Solid deep red color, much earlier than ordinary Baldwin. The color makes it sell better. This new strain will bring new profits to the grower of Baldwins. Late fall.

➤ CORTLAND. A new variety resulting from cross pollination of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red Apple, approximately the same size and fine flavor of the McIntosh, but ripens 3 weeks or a month later. Good keeper.

➤ GALLIA BEAUTY. A Rome Beauty type of Apple identical in every respect, except its earlier coloring qualities; recommended for commercial planting. Harrisons' have the genuine original strain of Gallia Beauty.

➤ JONATHAN. Medium to large, red, juicy. Good keeper and shipper.

➤ KENDALL. A most attractive McIntosh strain—new variety.

TURLEY. A seedling of Winesap which it somewhat resembles. Fruit rounded conical in shape, much larger than the Winesap, smoother skinned and deeper and richer in color; juicy and rich flavor. Tree very hardy and comes into bearing early.

CRAB APPLES

Priced on page 17
Double Purpose—An Ornamental and Fruit Tree

Combined
HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc. and good to eat fresh. Tree handsome.

HYSLOP CRAB APPLE
The Dual Purpose Tree

➤ DOLGO—An abundance of beautiful little, bright-red-all-over apples in the fall. Glistening, white blooms in the spring. Best apple for jelly as it rates highest in pectin. Delicious to can whole in spices. Needs very little sugar. Extremely hardy everywhere.

BLACK TARTARIAN SWEET CHERRIES—Juicy, Rich Flavor

SWEET CHERRIES

What fruit is more pleasing than the Sweet Cherry? The ideal fruit to plant in the back yard. We have a good supply of first-class trees in the following varieties:

- **BING.** Very large, dark brown, flesh firm, sweet. Midseason.
- **BLACK TARTARIAN.** Very large, sweet, purplish black color, juicy, rich flavor, heavy bearer and most profitable sweet variety grown. Early.
- **GOLDEN WAX.** Large, yellow, fine flavor. Bears bumper crops. Easily grown. Midseason.
- **GOVERNOR WOOD.** Large, light yellow, marked with red, sweet flavor.
- **LAMBERT.** Extra large, sweet, jet black, very popular. Midseason.
- **NAPOLEON.** (Royal Ann.) Large, pale yellow, bright red cheek, sweet, excellent flavor, prolific bearer. Midseason
- **SENECA.** Resembles Black Tartarian, but ripens two weeks earlier, rich sweet flavor
- **SCHMIDT.** (Schmidt's Bigarreau.) Large, sweet, deep black, tender, fine flavor. Midseason.
- **WINDSOR.** Large, sweet, almost black, fine quality. Valuable late.
- **EMPEROR FRANCIS.** Large, high quality, resembles Napoleon
- **YELLOW SPANISH.** Large, sweet; yellow with red tinge. One of the most beautiful and popular of the light-colored Cherries. Heavy bearer. Mid-season

Fancy BARTLETT PEARS

ALWAYS TOP

BARTLETT PEAR
So Full of Juice
You Can Eat
Them With
a Spoon

- 1—Superb Quality
- 2—Heavy Cropper
- 3—For Home or Commercial Grower
- 4—For Eating and Canning
- 5—Bear Early
- 6—A Harrison Brothers Speciality

For home, for canning, for market, the best. Ripens during summer.

A golden colored Pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest Pears that grows, to eat raw. A mingling of the flavor of Bartlett Pear and Quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as some other sorts. The trees do especially well with high culture.

Fancy Bartletts Bring Highest Prices

Bartlett Pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack Apples. Pears are sometimes packed in Peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes. One or two Bartlett Pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER

SURE CROPPER—EASY TO GROW

Of all the Pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer and Koonce are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial Pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermilion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning Pear.

- **BEURRE BOSCH.** Large size, fine quality, brings highest market price. Late.
- **BEURRE D' ANJOU.** Large, green in color, somewhat yellow when ripe, buttery, melting, rich, vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.
- **CLAPP'S FAVORITE.** Large size, hardy and very productive. Thrives where other varieties fail. Very early.
- **DOUGLAS.** Very resistant to blight. A winter Pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.
- **DUCHESS.** Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

DWARF PEARS

These attractive small trees require very little space, produce big delicious fruit, and often bear year after planting. Plant two varieties for cross pollination.

Varieties available:

- Bartlett
- Dutchess
- Clapp's Favorite
- Seckel

Price: 2 yr, 3-4 ft., \$3.25 each; 3 for \$9.00.

➤ **KOONCE.** One of the earliest Pears, free from blight, does not rot at the core like many early Pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for southern states.

➤ **SECKEL.** A beautiful and delicious little Pear. One of the richest and highest flavored Pears grown. Tree dwarf, bears prolific crops. Late.

➤ **WORDEN SECKEL.** A seedling of Seckel. Superior in size and color. Mid-season.

FOR ONLY \$3.25

Five Varieties of Apples for Fresh Eating from Late June Until Early November produced on the same tree

Here's the opportunity for those with limited space to have five highly desirable varieties of Apples all fruited on one tree for a little more than the cost of any tree. Requires only 25 ft. space when fully grown. Each tree is budded to Large Transparent for first summer variety; Williams' Early Red, Red Gravenstein, Triple Red Delicious and Yellow Delicious for summer varieties; Spartan Red Stayman and Red Rome Beauty for winter varieties.

Budded to 7 varieties, however, guaranteed to have 5 or more.

2 year, 4 to 5 feet, well branched at \$3.25 each.

3 year, 5 to 6 feet, extra well branched with good heads at \$4.50 each.

Jumbo Size, 3 year 6 to 8 feet, extra well and heavily branched with beautiful heads at \$5.40 each.

Fruit Trees are Too Large for Parcel Post Shipment-We Recommend Express.

If Your Space Is Limited

Plant one or two of these small trees. You will have a variety of Apples hanging over your station. Distinctive as an ornamental with shade tree as well as for its fruit.

New Gigantic Red MacDonald Rhubarb

If you want something different, something delicious in garden fruits, then plant some of this grand new MacDonald Rhubarb.

Stalks are of giant size on mature plants, and a rich rosy red in color. This beautiful color carries through the stalk. Sauce made from it has the red color of a dish of Strawberries. Flavor is mild and pleasing. This new Rhubarb does **not** send up seed stalks and never becomes tough or stringy. Just cut in small chunks and cook. Do **not** remove the tender skin; it cooks right up with the stalk.

Heavy plants: \$1.00 each; 6 for \$5.40.

NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all time commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—\$400.00 per acre the third year. They are exquisitely mild, sweet and delicious, and bring highest prices on the market. The demand for Blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollenization.

Very Ornamental

As an ornamental shrub the Blueberry cannot be surpassed. Full of lovely pink blooms, which open to bell-shaped, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

BLUEBERRIES—Ornamental as well as fruitful
Jumbo Size—Bear First Year Planted

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or Rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: June, Rancocas, Concord, Stanley, Rubel, and Jersey.

Prices: Jumbo size 4-year-old, 2 to 3 ft., \$2.50 each; 3 for \$6.75; 10 for \$20.00

LEADING BLUEBERRIES

Listed in Order of Ripening

→ **JUNE.** Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

→ **RANCOCAS.** The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

→ **CONCORD.** The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter.

They usually ripen a few days earlier than Rubel and are fine in flavor and appearance.

→ **STANLEY.** Tall, vigorous bush with large, thick shiny leaves. Good producer of large berries, considered best flavored of all varieties.

→ **RUBEL.** A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

→ **JERSEY.** The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue, and ripen about the same time as Rubel.

Grow Finer Flavored Berries

With Harrison's' ^{Select Certified} Raspberry Plants

LATHAM

WORLD'S LEADING RASPBERRY

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect you will be both delighted and surprised after giving it a trial.

Large Berries— Tremendously Productive

Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. Latham ripens with Cuthbert, covers a longer fruiting season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark, rich red.

A Blue Ribbon Winner for the Home and Commercial Grower. It simply cannot be equalled.

BERLIN, MARYLAND

CUMBERLAND

Every Garden Should Have INDIAN SUMMER Sensational New Everbearing Raspberry

A dish of big red juicy Raspberries sprinkled with sugar and swimming in pure cream, it can be yours for every meal from June into July, and again from mid-September until frost, if you will plant Indian Summer. Makes tasty, scarlet-red sauce or pie and the finest jams and preserves you ever tasted. Frozen Indian Summer Raspberries is like having them fresh from your garden the year 'round.

Indian Summer Raspberries are no experiment; they have fruited successfully for thousands of gardeners in nearly every section of the country. This is truly a champion for your garden. Order early.

The Most Popular Black Raspberry CUMBERLAND

Midseason to late. This is the most popular Blackcap of the present time, because of its great size, firmness, and productiveness. The fruit is the largest of the Raspberry family, and is of such handsome appearance that it is sure to bring the top prices on the market.

A BIG CROP EVERY YEAR

Cumberland has never been known to fail to produce a big crop every year. This variety is perfectly hardy and tremendously productive, the bushes are vigorous, upright and healthy. Berries are glossy black in color, not equalled by any other variety in quality, flavor and appearance. It's good to eat and good to sell.

Here's Another Extra Good Blackcap The Mammoth New MORRISON

This brand new variety has been a sensation wherever planted. Mammoth sized berries, glistening jet-black color, rich flavor, fewer seeds, heavy producer. The thrifty, strong, hardy plants are heavily rooted and disease resistant. Easy to grow, excellent for canning, eating fresh, freezing. Ripens slightly later than Cumberland.

New the Sensational Boysenberry

**HARRISON
BROTHERS**
BERLIN,
MARYLAND

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length
NEW LOWER PRICES

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as Blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for \$1.35; 6 for \$2.15; 12 for \$3.15; 25 for \$4.95; 50 for \$8.55; 100 for \$14.85; 250 for \$32.00; 500 for \$51.75; 750 for \$70.85; 1000 for \$90.00.

Lucretia Dewberry

Long, mammoth black berries, recognized as the leading variety. Incomparably better in every way than any Blackberry you have ever seen or tasted. Lucretia is a very early bearer, ripening from a week to ten days before even the earliest Blackberries. Big, uniform size makes them top-notchers in price on any market. For real profits and for home and commercial growing, Lucretia is the only variety of importance.

No. 1 Plants: 6 for \$1.70; 12 for \$2.45; 25 for \$3.90; 50 for \$6.65; 100 for \$11.55; 250 for \$24.95.

LUCRETIA DEWBERRY

EBONY KING BLACKBERRY

*A Heavy Yielding Blackberry
that Spells Success Everywhere*

The sensational New super-bearing Blackberry that is proving superior to most varieties because of its ability to bear consistent heavy crops and the fact that non bearing plants are at once distinguishable and can be removed if necessary. Abortive blossom blight is present in most of our fine old types making them worthless in many cases. Ebony King is among the very best we have observed and we are glad to offer a really good blackberry to our customers. Berries are large, Glossy-black, very high dessert quality, suitable for processors, home use or fresh fruit markets. Plants are very thrifty and hardy. Fruit ripens early. If you want a real heavy producing, upright Blackberry be sure and plant Ebony King this year. 6 for \$2.00; 12 for \$3.85; 25 for \$7.40; 50 for \$14.00; 100 for \$22.50; 250 for \$54.00.

EBONY KING
BLACKBERRY

GOOSEBERRIES

➤ **RED JACKET.** Big, roundish oblong berries, with a mild sweet flavor. Delicious for fancy desserts, salads, preserves, pies, etc. Bushes lovely as shrubs. Small, yellow bloom.

➤ **DOWNING (Green).** Large greenish yellow variety favored for shipping and canning. Highly flavored.

Large, 1-yr. bushes, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

DOWNING GOOSEBERRY

**HARRISON BROTHERS
NURSERIES
BERLIN, MARYLAND**

CURRENTS

➤ **NEW RED LAKE.** Biggest, sweetest, finest improved Red Currant on the market. Large bunches, produced in profusion. Extra hardy.

➤ **WILDER.** One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color.

Large, 1-yr. bunches, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

NEW RED LAKE CURRANT

BOYSENBERRIES—A Real Treat,
Easy to Grow

HARRISON'S BIG YIELD STRAWBERRY PLANTS

Plants referred to as "virus-free" on this page have been field-grown from virus-free foundation stock furnished by U. S. D. A. Plants have been dusted with parithion to control aphids which transmit the virus disease. Since virus do not produce clear-cut symptoms in most strawberry varieties but simply weaken and devitalize the plants, no guarantee can be made that these plants are 100% free of virus. Because of the measures that have been taken to protect these plants from virus infection, believe them to be substantially virus-free.

NEWEST VARIETIES

"VIRUS-FREE" PLANTS

POCAHONTAS—(Early)

A new introduction of the U.S.D.A. A large, deep vivid red berry is produced from the exceptionally vigorous plants. Highly flavored. A leader due to its strength and productiveness.

DIXIELAND—(Early)

A new introduction of the North Carolina Agricultural Experiment Station. The vigorous growing plants have a strong color and produce berries considerably larger and much firmer than Blakemore. Berries are very uniform in shape and ripen about the same time as Blakemore. Truly an excellent shipper and the best to date for freezing.

STELMASTER—(Early)

One of the latest introductions of the U.S.D.A., Beltsville, Md. Because of its resistance to all races of "Red Stele" now known in the Eastern United States. The champion of all in this respect. Ripens about the same time as Blakemore. Berries are uniform, smooth, and of good size. Flesh is light red, juicy, and firm, with flavor mildly sub-acid.

ROBINSON—(Midseason)

Ripens just after Premier, at a time when berries bring a good price. Berries are large, brilliant red, uniform in size. Vigorous grower and a heavy yielder.

SPARKLE—(Midseason)

A vigorous grower and very productive. Berries are somewhat round in shape, of excellent quality and splendid for freezing.

ARMORE—(Midseason)

Introduced by the Missouri Experimental Station, this variety has proved more productive than 60 others in actual test. Berries are of good size, a beautiful red and of excellent flavor; a firm, good keeping, good shipping variety.

VERMILION—(Midseason)

Introduced by the University of Illinois. Very productive, of good size berries; fine quality.

Dependable-Hardy-True-to-Name

Harrison's Selected Strain "Big Yield" Strawberry Plants Are Better WELL-KNOWN STANDARD VARIETIES

PREMIER King of the Early Berries

Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more Strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home gardens, local markets, or for shipping moderate distances it has outclassed all the other varieties.

BLAKEMORE

No Strawberry has become so popular so quickly as Blakemore. It is the most popular variety in all America. Ripens several days before Premier and is equally dependable, producing big crops every year. The plant is healthy and stands up well during drought. The berries are large, firm, an attractive red and good quality. Fine for canning and preserving because it holds its color and shape so well.

FAIRFAX, Early

The Sugar-Saving Berry

Color is a deep, full red, its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

CATSKILL—Midseason

A midseason berry that will produce the largest crops of bigger berries of any midseason variety. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaptation. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

RED STAR HERE'S A NEW ONE Extra Good—Very Late

This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short, stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row, and plenty of money can be made from growing this one, as late berries always bring a high price.

"VIRUS-FREE" STRAWBERRY GARDEN OFFER No. 28

25 PREMIER 25 RED STAR
ALL FOR \$3.75

Pick World's Finest Strawberries

IT PAYS TO PLANT OUR SELECTED
"BIG YIELD" STRAINS

→ SUPERFECTION—EVERBEARING

This exceptionally large, round, red to the center berry, has a sweet, pleasing, mellow flavor and is delicious to eat fresh, canned, preserved in jams and jellies, as well as fresh frozen. Bears an abundance of large berries throughout the late summer and fall season.

A TRIPLE YIELD

- 1—Plant this spring.
- 2—Pick first crop, July to frost.
- 3—Pick second crop, June next year.
- 4—Pick third crop, August to frost next year.

3 REAL CROPS—3 BIG PROFITS

Bears in 90 Days, and, too, It's the Best Family Garden Strawberry—Loots of Big Berries in 90 Days

EVERBEARING STRAWBERRIES

DRASTIC SCARCITY OF STRAWBERRY
PLANTS FOR SPRING 1958

Reason due to reduced acreage and the severe drouth during the growing season of 1957.

The Del-Mar-Va Peninsula grows more strawberry plants than any other nursery area in the United States.

EVERBEARING STRAWBERRIES

Extra!

STREAMLINER

The Greatest Everbearing Strawberry

SWEET AS HONEY—EXTRA LARGE
EXCELLENT FOR EATING FRESH OR FREEZING
MAKES HEAVY FRUITING BED

- Berries in 90 days or less. No need to wait several months. Plants planted in March or April will commence bearing in early July and bear until frost.
- Three Big Crops From One Planting. Streamliner needs no nursing along as some everbearers do. They are thrifty growers, and do not require exacting soil requirements. Pick your first crop this summer and fall, second crop next June, third crop the following summer and fall.
- It costs less to grow your own berries if you plant Streamliner. Easy to grow, just space them 12 to 15 inches apart in the row with the rows 2½ to 3½ feet apart

A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened Strawberries. They are more delicious and usually sell for 10¢ to 25¢ more per quart. Customers pay premium prices for garden fresh Strawberries and small growers make real money, up to \$500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrison's "Big Yield" Strawberries. Others are doing it, why not you. It costs only a few dollars to get started.

→ TEMPLE (MIDSEASON)

Bred for heavy yields and resistance to disease. Named after Prof. C. E. Temple of the University of Maryland, whose efforts started the work of cross-breeding Strawberries for disease resistance. Temple is not only a heavy yielder of fine looking berries, but they are of the highest quality and are suitable either for home or commercial production. One of the easier varieties to grow, as it thrives on soil that is too wet for other kinds.

→ BIG JOE The Old Reliable Midseason Variety

LARGE YIELD—FANCY FRUIT
FINE FLAVOR

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well with good care and fertility. Be sure to include Big Joe in your planting this spring. Our big yield strain insures big crops.

→ FAIRPEAKE The Favorite Late Berry

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

HARRISONS' BIG YIELD GRAPE VINES

BEAR BETTER CROPS OF BETTER FRUIT.

Harrison Brothers Selected Varieties Grapes

AGAWAM. Red. Midseason. Large, thick skin, aromatic flavor. Vines strong, rank grower. Hardy and productive. Ripens with Concord

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large. Flesh pulpy with rich, vinous flavor. Quality good. A very desirable variety.

DELAWARE. Red. Early midseason. Bunch and berry good size, compact, flesh juicy, very sweet and refreshing. Vine very hardy and productive. A slow grower. Requires rich soil, good culture, close pruning.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully ten days before Moore's Early.

NIAGARA. White. Midseason. Best of the standard light colored Grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent Grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard

Concord Grapes

For Quick Crops Plant JUMBO GRAPE VINES

Big crops of luscious Grapes, some the first season planted. No other fruit bears so much for so little attention. Our Jumbo Grape Vines have already fruited in the nursery.

BUDDLEIA

(Butterfly Bush)

Blooms early summer
to late fall. Medium height.
Weeks of colorful bloom in
panicles up to 18 inches long.
12 TO 18 INCHES 50 CENTS EACH
1 1/2 TO 2 FEET 70 CENTS EACH

HYDRANGEA PEE GEE

DEUTZIA,
PRIDE OF ROCHESTER

CREPE MYRTLE (*Lagerstroemia Indica*). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1 1/2 to 2 ft., \$1.50 each.

QUINCE, FLOWERING (*Cydonia Japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to 1 1/2 ft., \$1.00 each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, \$1.00 each.

WEIGELA, EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. 1 1/2 to 2 ft., \$1.00 each; 2 to 3 ft., \$1.25 each.

BEAUTY BUSH. Pink tubular flowers, heavy bloomer, hardy. 2 to 3 ft., \$1.25 each.

HYDRANGEA PEE GEE (*Hydrangea Paniculata Grandiflora*). Large flowers; first snowy white, then pink, changing to reddish bronze in the fall. Blooms mid-summer to fall. 18 to 24 inches, \$1.00 each.

GARDENS BURST INTO GLORY

With blooms of Harrisons' Berlin, Maryland, grown Hi-Quality Flowering Shrubs.

ALTHEA or ROSE OF SHARON (*Hibiscus Syriacus*). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

BUDDLEIA MAGNIFICA. New and undoubtedly the finest of all the summer-flowering Butterfly bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (*Cornus Alba Sibirica*). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

HONEYSUCKLE, BUSH (*Lonicera Morrowi*). Early white flowers in June, followed by red berries.

PINK MAGNOLIA

(*Magnolia Soulangeana*)

Our most outstanding early spring blooming plant. Large pink blooms. Grows in bush or tree form. Every garden should have one or two of these remarkable plants. Prices—Storg Field Grown Plants—Each \$2.75; 2 for \$4.90.

SYRINGA, SWEET MOCK ORANGE or GARLAND (*Philadelphus Coronarius*). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (*Calycanthus Floridus*). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and wood have a spicy fragrance.

TAMARIX, AFRICAN (*Tamarix Africana*). Feathery gray-green foliage; very showy.

TARTARIAN HONEYSUCKLE (*Lonicera Tatarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (*Weigela Rosea*). The most popular Weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

ROYAL BLUE HYDRANGEA

(*Hydrangea Otakss*)

Old favorite southern Hydrangean. When winters are severe we suggest heeling in. Large balls of blue flowers and attractive large leaves. Color depends on acidity of soil. Field-grown plants, \$1.50 each; 2 for \$2.80.

Harrison Brothers, Berlin, Maryland

NORTHERN STRAIN

CHINESE ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea, withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wooded shade tree. It resembles the American Elm except that leaves are smaller, with the gracefulness of a Cut-Leaf Birch. **Prices: 3 to 4 ft., \$.95 each; 4 to 5 feet., \$1.45 each; 5 to 6 ft., \$1.95 each; 6 to 8 ft., \$3.00 each. 8 to 10 ft., \$4.50; 10 to 12 ft. \$6.00.**

AMERICAN PLANE

(*Platanus Americana*)

Very attractive, well known, rapid growing shade tree. Foliage large and maple-like. **Prices: 4 to 5 ft., \$1.75 each; 5 to 6 ft., \$2.75 each; 6 to 8 ft., \$4.25 each.**

AMERICAN ELM

(*Ulmus americana*). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers, in a tall vase. **Prices: 4 to 5 ft., \$1.45 each; 5 to 6 ft., \$1.95 each; 6 to 8 ft., \$3.00 each.**

LOMBARDY POPULAR

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful. **Prices: 5 to 6 ft., \$1.25 each; 6 to 8 ft., \$1.95 each.**

SILVER MAPLE

Rapid growing. **Prices: 3 to 4 ft., \$.95 each; 4 to 5 ft., \$1.45 each; 5 to 6 ft., \$2.00 each; 6 to 8 ft., \$3.25 each; 8 to 10 ft., \$5.00 each; 10 to 12 ft., \$7.50 each.**

CHINESE ELM—Quickest Growing Tree in the World

WEeping WILLOW

A rapid growing, hardy tree, thriving in any moist soil. The Willows are valuable and interesting subjects on account of their graceful aspect. **Prices: 5 to 6 ft., \$2.50 each; 6 to 8 ft., \$3.25 each.**

NORWAY MAPLE

Typical Maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. **Price: 6 to 8 ft., \$4.75 each.**

ORIENTAL PLANE
The Famous Light Bark Tree

ORIENTAL PLANE

(*Platanus Orientalis*)

A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy. Won high popularity in recent years due to its many merits, which have made it the most useful and the most sought for shade tree for lawns, parks, streets and highway plantings. **Prices: 4 to 5 ft., \$1.75 each; 5 to 6 ft., \$2.75 each; 6 to 8 ft., \$4.25 each.**

CHINESE CHESTNUTS

Now You Can Grow Chestnuts!
Blight-Resistant Chestnut Trees

Only two years from this fall, right in your own grounds, you can pick big, fat, tasty Chestnuts from the trees you plant this year! Remember gathering Chestnuts in the good old days—haven't you felt sorry for your children because they couldn't? The devastating blight that stripped our forests of the native Chestnut was an American tragedy! Now these hardy, blight-resistant Chestnut trees will bring them back. More than that, you need not wait 15 to 20 years for nuts—they'll bear year after year!

Plant in abundance Harrison's strain of Chinese Chestnut Trees.

PRICES: 2 to 3 ft., \$2.50 each.

AMERICAN FILBERT (Hazel Nut)

AMERICAN FILBERT

(Hazel Nut)

Old family favorite. Small, attractive bush, yielding abundant crops of tasty, round nuts. Bears very young.

PRICES: 2 to 3 ft., \$2.00 each.

ENGLISH WALNUT

(*Juglans Regia*)

Thin shelled, large, delicious nuts, producing heavy crops and demanding good prices. The most popular Walnut grown.

PRICES: 2 to 3 ft., \$2.75 each.

ENGLISH WALNUT

CHINESE CHESTNUTS

HARRISONS' DECORATIVE EVERGREENS

Our Splendid Trees Embellish the Grounds of Beautiful Homes the Country Over

COMPACT GLOBULAR ARBOR-VITAE

GOLDEN RETINOSPORA

SPREADING YEW

SPREADING YEW

The beautiful Yew of moderate bushy growth, usually grows wider than it does tall, starts branching from the bottom, developing into a bush form. The spreading branches are densely clothed with short leaves of dull green. It is the most attractive spreading evergreen, will grow in semi-shady locations. Hardest of all Yews. By trimming the side branches the plant can be made to grow semi-upright and likewise by trimming the top branches the plant can be made to develop lower to the ground. Can also be trimmed into globe shape. Prices: 12 to 15 inch \$2.50 each. 8 TO 10 INCHES. \$1.00

GOLDEN RETINOSPORA

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feathery, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen. Price: 12 to 15 inches \$2.00.

COMPACT GLOBULAR ARBOR-VITAE

Natural compact, globe-shaped, dark green foliage. The ideal low growing plant for massing against the taller evergreens in foundation plantings. Price: 12 to 15 inch \$2.00. 8 TO 10 INCHES, EACH \$1.00

PYRAMIDAL ARBOR-VITAE

Probably no evergreen is more admired than Pyramidal Arbor-Vitae with its beautifully carved foliage of deep green, its graceful, refined habits and its artistic upright shape. These features make it indispensable in the home foundation groups and in the lawn and garden plantings. Price: 18 to 24 inch \$3.00 each. 8 TO 10 INCHES, \$1.00 EACH

IRISH JUNIPER

Forms a narrow and dense column, compact, bluish green foliage. Most attractive when planted around the foundation of a home at corners and entrances. Price: 24 to 36 inch \$3.00 each. 8 TO 10 INCHES, EACH \$1.00

HICKS' YEW
(Taxus cuspidata Hicks)

HICK'S YEW

Another form of Yew that is very similar to the Irish Yew, but is a much faster grower. The branches ascend almost vertically, generally growing with many stems. Its rich dark glossy green makes it much more attractive than Arbor-Vitae or Junipers. Price: 12 to 15 inch \$2.50 each. 8 TO 10 INCHES, EACH \$1.00

PYRAMIDAL ARBOR-VITAE

AMERICAN BOXWOOD

American BOXWOOD

GROWN BY HARRISON BROTHERS
BERLIN, MARYLAND

Steps Out Ahead

—the real Aristocrat of the Evergreen family

YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM HARRISONS'

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves

on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

PRICES OF AMERICAN BOXWOOD
10 to 12 inches \$1.50 each; 10 for \$12.50

OLD ENGLISH BOXWOOD.

The famous Dwarf Boxwood so much admired in old gardens. Slow growing, compact, most attractive. Will grow in sun or partial shade

3 to 4 in. 55c ea.; 10 for \$5.00
4 to 6 in. 85c ea. 10 for \$7.50
6 to 8 in. \$1.25 ea.; 10 for \$11.00

IRISH JUNIPER

All evergreens are shipped with Moss on the Roots.

AZALEA—A Miracle of Loveliness

AZALEA HINODEGIRI

Deep Coral-Pink Flowers

Azalea Hinodegiri is a dwarf grower with ever-green foliage. In the spring it produces a profusion of deep coral colored blossoms, completely hiding the foliage. Ideally suited for planting around the foundation of homes or adding color in front of ever-greens. Grows well in the shade or sunlight.

AZALEA MACRANTHA

Large, single, salmon-red flowers. Late bloomer with dark green, glossy leaves that remain on the plant all winter. Same prices as Azalea hinodegiri.

FLAME. Bright flame red, suffused with copper.

CORAL BELLS. Shell-pink, shading deeper at center.

HINO-CRIMSON. Brilliant red. Good. Does not fade.

SALMON BEAUTY. Large salmon-pink flowers.

	Each
4 to 6 inches	\$1.00
6 to 8 inches	1.50

THE FAMOUS CALIFORNIA PRIVET—The Best Low Cost Hedge—Grown by Harrison Brothers, Berlin, Maryland

California Privet is the Leading Low Cost Hedge Plant

CALIFORNIA PRIVET

(*Ligustrum ovalifolium*)

This is the universal hedge in the East, a fact proving that Privet has greater merit under ordinary conditions for this purpose than any other plant. For live fences at village, town and country homes it is the very best of all materials. On public grounds of all kinds, parks and cemeteries, along roads and paths, on factory grounds, and on newly subdivided areas near towns, nothing else can be used in its place, and in this place it is indispensable. It is the best of all hardy hedge plants. Can be easily kept at any height desired; has glossy, deep green leaves, and holds them until late fall. Its strong, quick, upright growth makes it useful for screening out unsightly objects.

SPIRAEA VAN HOUTTEI
Always Makes an Attractive Hedge

GREEN BARBERRY

(*Berberis Thunbergi*)

The best low dense hedge plant grown. Its abundant, small light green leaves, which turn to rich colors in autumn, and its wealth of scarlet berries make it very attractive. Extremely hardy and requires but little pruning. Ornamental and graceful the whole year.

SPIRAEA VAN HOUTTEI

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen, in groups, in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

BUSH ARBUTUS

(*Abelia Grandiflora*)

By Far the Best Evergreen Shrub

One of our beautiful, popular and satisfactory broad-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers tinged with pink, about an inch long, which are borne in clusters. Good for shady locations.

RED-LEAVED BARBERRY

(*Berberis Thunbergi Atropurpurea*)

A highly important introduction among shrubs, giving us for the first time a practical, easily grown shrub of medium height, with good, distinctly red foliage. This must prove a boon to all types of landscaping, where studied contrasts are to be worked out with the shrub foliage depended on for color. Red berries during winter.
